

MARYNA SVINARENKO

QA ENGINEER

SUMMARY

I am a Junior QA Tester. I understand that working as a tester is very responsible. The tester is almost the last instance before the product reaches the end user. But also testing is a creative root, in the process of which it is necessary to come up with many ideas for product testing in order to gain confidence in the product and customer satisfaction. I like new challenges and I'm really interesting with it. I am a good team player. That's why I am looking for a company that will give me the chance to learn and develop myself as a Software Tester.
